Patient: Robert Davis
DOB: 05/18/1974
MRN: MRN-884920
Date of Visit: 10/04/2026
Ordering Clinician: Dr. Marcus Chen, MD
NPI: 1942083319

CHIEF COMPLAINT: Low back pain with radiculopathy into left L5 dermatome.

HISTORY OF PRESENT ILLNESS:
52-year-old male with severe low back pain for 3 months radiating to left foot. Attended 16 sessions of physical therapy between August and September 2026 without relief. Trial of Meloxicam 15mg daily x 8 weeks failed.

PHYSICAL EXAMINATION:
Positive Straight Leg Raise on left at 40 degrees. Left extensor hallucis longus strength 4/5. Sensation decreased over left L5 distribution. No cauda equina signs. Bowel and bladder normal.

ASSESSMENT & PLAN:
1. Lumbar radiculopathy, left L5 dermatome (M54.16)
2. Low back pain (M54.51)
Plan: MRI Lumbar Spine without Contrast (CPT 72148).
